

FYBAFELT - EU TOY SAFETY DIRECTIVE - CHEMICAL RISK MANAGEMENT EN71 PART 3 TOXICITY 2013 AND PART 2 FLAMABILITY

TO USERS OF FYBAFELT:

In accordance with the EU Toy Safety Directive - Chemical Risk Management EN71 Part 3 - 2013 samples of Fybafelt have been tested by an independently accredited UK testing laboratory and on the 17th September 2013 found to fully comply with the EU Directive EN71 Part 3 2013 in respect of the levels of heavy metals as stipulated in the directive that may or may not be present.

This statement therefore confirms Fybafelt and Fybafelt derivatives comply with the EU Toy Safety Directive - Chemical Risk Management EN71 Part 3 2013.

We can also confirm Fybafelt and Fybafelt derivatives comply with the EU Toy Safety Directive - EN71 Part 2 Flammability.

The original laboratory certificates are held by Fybagrate and are available for inspection at our offices by prior arrangement. Please note for security reasons copies of the original laboratory certificates will not be issued or sent by post, email or facsimile as this declaration confirms compliance.

Please note this statement applies only to genuine Fybafelt manufactured by Fybagrate. It is the responsibility of the user to ensure the felt they are using is genuine Fybafelt as Fybagrate cannot accept any responsibility for felts failing to comply to the EU Toy Safety Directive - Chemical Risk Management EN71 Part 3 Toxicity 2013 and EN71 Part 2 Flammability other than genuine Fybafelt.

Issued 18th September 2013.
